Address: Abangan Norte, Marilao, Bulacan

OBJECTIVES

Information Technology student seeking an Internship / OJT position where I can apply my technical skills, research-oriented mindset, and problem-solving abilities to support technology-driven customer experience solutions. Committed to learning from experienced mentors and gaining practical exposure to IT support, system troubleshooting, web development, UI/UX design fundamentals, and basic network operations.

CAPSTONE
PROJECT

MotoMod: Custom Motorcycle Builder with Real-Time Parts Shopping | December 2025

- Programmed the core motorcycle customization feature using Unity and Visual Studio, allowing users to change and preview motorcycle parts in real time
- Implemented part selection and swapping logic to ensure smooth and accurate customization
- Conducted testing and basic troubleshooting to maintain stable system functionality
- Documented system features, basic technical processes, and user flow for reference
